

ABSTRACT

A system, computer product and method for providing a private  
5 communication portal at a first computer connected to a network of computers  
includes a communication facility resident at the first computer, and a second  
computer including a locating facility for locating the current location of the first  
computer on the network, where the second computer facilitates communication  
10 between the first computer and a third computer by authenticating the third computer  
for communication with the first computer and providing the location of the first  
computer for communication with the third computer.
